## Rhodium Coated Intraoral Photography Mirrors

### Improve Your Image

All photographic mirrors are not the same. Mirrors coated with Rhodium, a silvery white precious metal, provide clearer, brighter images that will produce higher quality dental pictures. Superior quality pictures are an excellent tool to help improve clinical effectiveness as they may be used to promote patient education and help explain why major restorative treatment is necessary. They also provide documentation for patient records, insurance claims and case presentations to colleagues. A quality picture really is worth a thousand words!

#### Quality Features Include:

##### Highest Reflectivity

Clear, sharper images with Rhodium coated mirrors

Up to 10% more reflectivity than chrome mirrors

Up to 20% more reflectivity than metal mirrors

##### Highest Quality

Dual-sided mirror meaning twice the life of one sided mirrors

More durability from flatter, higher quality substrate, which allows better adhesion of Rhodium coating to provide outstanding wear resistance

Able to withstand repeated autoclave cycles up to 350°F/180°C

##### Patient Comfort

Thicker mirrors with rounded corners make these more comfortable in the patient's mouth

Both adult and pediatric sizes - makes it easy to pick the right shape for your patient

## PHOTOGRAPHY MIRRORS

	<p><b>Tracing Paper</b> Smooth matte surface and near transparency gives extra sharp lines when tracing radio-graphs. Uniformly cut in 8" x 10" sheets. (Padded 100 sheets/pad)</p>	630-020

# ORTHOPEDIC PRODUCTS

ITEM	DESCRIPTION
------	-------------

**Cushioned Lip Bumpers**

Formed .045" spring tempered Stainless Steel wire features contoured anterior pad with smooth radii. Positive contact with soft tissue provides greater efficiency in distalization and arch development. Pad is slightly flexible for minor anterior wire adjustments. Posterior of wire features adjustable molar loop stops and ligation hooks for tying to molar tubes. Lip bumper sizing is from distal of the omega loop around the contour of the arch to distal of the opposite omega loop.

**LIP BUMPER SIZING CHART, 2/PK**

Cushioned Lip Bumper Kit. Includes one each of all seven sizes.		424-029
Size 1	80mm	424-021
Size 2	86mm	424-022
Size 3	92mm	424-023
Size 4	98mm	424-024
Size 5	104mm	424-025
Size 6	110mm	424-026
Size 7	116mm	424-027

**Coated Lip Bumpers**

Formed .045" spring tempered Stainless Steel wire features nylon coated anterior with smooth radii for increased patient comfort. Ligation hooks are mesial to the adjustable cuspid loops and can be used to tie-in buccal tubes. Cuspid loops provide larger lip contact area for increased distal force. Useful in arch expansion, distalizing, and uprighting molars.

**COATED LIP BUMPER SIZING CHART 2/PK**

Coated Lip Bumper Starter Kit. Includes one each of all seven sizes.		424-019
Size 1		424-011
Size 2		424-012
Size 3		424-013
Size 4		424-014
Size 5		424-015
