

NATURALGOLD™

Hydrothermal Ceramic Crowns & Bridges

NaturalGold Crowns and Bridges offer all the esthetics and craftsmanship you've come to expect from Aurum Ceramic Dental Laboratories. Offer your patients the best in anterior crowns, posterior crowns and up to six unit bridges (anterior or posterior). Single tooth anterior implant restorations are also available.

Choose from a full range of **all-gold** or **porcelain-fused-to-metal** crowns or bridges:

- **NaturalGold™ (Full Cast):** Rich yellow gold crown - no porcelain.
- **NaturalGold™ (Gold Occlusals):** Rich yellow gold coping with metal occlusion and porcelain labial/buccal surfaces.

• NaturalGold™ (Porcelain Occlusion):

Rich yellow gold coping with full porcelain coverage.

HIGH NOBLE, WARM YELLOW GOLD SUBSTRUCTURE

High noble NaturalGold copings can be cast thin for normal tooth reduction, a beautiful incisal edge and superior marginal integrity, eliminating microleakage. High gold alloys are the proven leader in biocompatibility, natural esthetics and strength. No other metal is as easy to use or supplies the same longevity.

SUPERB ESTHETICS

NaturalGold PFM Crowns and Bridges "opal effect" mimics the real tooth's reaction to light, actually reflecting the colors of adjacent dentition. This is reinforced by the gold substructure that provides natural yellow tones to the overall effect. In anterior restorations, collarless design is possible, avoiding visible metal and maximizing esthetics.

BENEFITS OF HYDROTHERMAL CERAMICS

1) Homogeneous structure

(smooth surface)

- low abrasion
- plaque resistant

2) Impact Resistant

(influenced by structure and hardness)

- crack resistant
- intraoral polishability
