

Let the natural beauty of your patient's teeth shine through!

- All the benefits of Pressed Glass-Ceramics - With minimal preparation.
- Can be as thin as .3 mm, based on your precise preparations.
- Combination of proven thermo-pressing technology and exclusive glass-ceramic materials provides high strength and precise marginal fit.
- Our experienced and talented veneering specialists have perfected unique techniques that allow for subtle changes in customized contour, fit or shade.
- Full palette of shades available. Far more resistant to staining and color changes compared to traditional, thin feldspathic materials.
- Incisals can be layered with translucent powders for exceptional esthetics.
- Adhesively bonded to tooth structure.
