

# NaturalFlex™ II

AVAILABLE ONLY FROM  
AURUM CERAMIC/ CLASSIC!

## **Super Strong Partials, Removable Bridges and Long-Term Temporaries**

Based on acetyl resin technology proven in European dentistry over almost a decade, new NaturalFlex II offers practitioners and patients a host of advantages over the original thermoplastic NaturalFlex material.

### **Wider Range of Treatment Options**

- Partial dentures and removable bridges with true long-term esthetics and strength.
- Tooth or tissue-coloured resin clasps every bit as thin as those made from metal - without sacrificing function or longevity.
- Also indicated for new applications including unilateral space maintainers, posts, temporary bridges, implant abutments, clasps on existing metal partials and orthodontic devices.

### **Unsurpassed Physical Properties**

- Light-weight, yet among the most resistant and stiffest non-reinforced materials.
- Excellent tensile and shock strength.
- Up to 20 times harder than restorations fabricated from standard acrylic materials.
- High elastic memory.
- Remarkable dimensional stability.

### **Excellent Patient Acceptance**

- Twenty colour-stable shades.
- Three different pink hues to match with conventional acrylic resins.
- Ensures a perfect customized esthetic match for each patient.
- Flexible for a comfortable fit. No need to warm appliance.
- Biocompatible, non-allergenic, monomer-free.
