

NaturalFlex™ II, Valplast® and Flexite®

Three Great Flexible Partial Options from Aurum Ceramic

- Hypoallergenic, biocompatible, monomer-free materials.
- Flexible prostheses with true long-term esthetics and strength.
- Tooth or tissue-colored clasps every bit as thin as those made from metal – without sacrificing function or longevity.

Valplast – for interim tissue borne solutions

- Based on nylon.
- Available in one clear and three pink shades.
- Appliance must be warmed prior to insertion.
- Lifetime warranty against breakage.

Flexite – for interim tissue borne solutions

- Based on nylon.
- Available in one clear, two pink shades and three ethnic shades.

NaturalFlex II – for more permanent tooth borne solutions

- Exclusively from Aurum Ceramic. Based on acetyl resin technology.
- Super strong, lightweight and translucent.
- Widest range of esthetic options with 22 color-stable shades (including 3 bleached shades and 3 pink hues).
- Flexible for a comfortable fit – without having to warm the appliance.
