

Futar® Scan

Perfect for CAD/CAM dentistry

Simply intelligent

- State-of-the-art, scannable bite registration material.
- Guarantees ideal results during recording via optics or laser in CAD/CAM systems.
- Best scan results for optical and laser systems (naturally without actually having to use powder!)
- Extra hard A-silicone (Shore-D 35 hardness) with excellent flexural stability.
- Cuts very well with a scalpel.
- Extra-fast setting characteristics: Total working time 15 seconds, setting time 45 seconds.
- Low material consumption due to extrusion through short mixing tip.
- Can also be used as a syringeable material for “conventional” bite registration, in terminal occlusion, or for all other applications that require an extra hard silicone.

Try Futar Scan - and Save 33%!

Buy one Econopack
(6 x 50 ml cartridges, 36 mixing
tips) at \$175.00
