## Featuring

**Richard A. Williamson,  
 D.D.S., M.S., F.A.C.P.**

**Dr. Williamson** is a native Texan and graduate of Texas A&M University. He received his D.D.S. from The University of Texas Health Science Center Houston. He maintained a solo general practice in College Station for 17 years before returning to graduate school at the University of Nebraska Medical Center, Lincoln. Dr. Williamson holds a certificate in prosthodontics and an M.S. in Oral Biology; he is a Diplomate of the American Board of Prosthodontics and a Fellow of the American College of Prosthodontists. Dr. Williamson lectures nationally and internationally to universities, study groups,

societies and dental laboratory associations on complete denture, removable partial denture, implant prosthodontic care and other restorative options. He is also an American Dental Association CELL Seminar Series Speaker.

Currently, Dr. Williamson is a Clinical Associate Professor in the Department of Family Dentistry. The majority of his teaching time is devoted to senior pre-doctoral students in both didactic and clinical training.

Dr. Williamson provides fixed, removable and implant prosthodontic care in a University of Iowa-based dental practice.

## Course Objective

This course will provide strategies for the Doctor / Technologist Team to provide highly esthetic and functionally stable complete dentures. Attendees will better understand:

- How to relate edentulous anatomy to the patient's prognosis
- How to establish a fair patient fee
- Implant Options and Treatment Planning Implant Prosthesis
- The doctor's, laboratory's and patient's role in complete denture success

- A Predictable Treatment Approach from impression making to denture delivery
- Strategies will be discussed on how Doctors can build a successful and rewarding complete denture component to their practice.
- Upgrading patients from complete dentures to implant prostheses
- Auxiliary Utilization to create a Win-Win for the Patient, Doctor and Lab
- Attendance by Doctors, Auxiliaries and Staff, Technologists and Students is desirable.

This course will enhance the participant's ability to treat the edentulous population in an efficient and professional manner, centered on quality patient care. The presented Treatment Planning Guidelines for implant-retained/borne prostheses will give the doctor / technologist confidence to incorporate implants into their armamentarium. The clinical knowledge attained by the technologist will facilitate greater and more effective communication with the doctor.

Including:

- Accurate Impressions
- Accurate Jaw Relations
- Contemporary Tooth Selection for Esthetics
- Tooth Positioning for Patient Personalization
- Myostatic Outline Form and the Posterior Palatal Seal
- A Simplified, Stable Denture Occlusion
- Case Selection and Treatment Planning the Implant Retained/Borne Prosthesis
