

Talk to your Dentist for more information

The options listed in this brochure are just a few of the possibilities available today for rejuvenating and protecting your family's natural, beautiful smiles. Make an appointment with your dentist for a personal examination or consultation. Please bear in mind that while your preferences and desires are always an important element of consideration, the ultimate choice of technique and type of appliance should be discussed with the one who knows best: your dentist.

Straight Talk about **CROOKED TEETH** and your family's smiles!

We Care About Your Family's Smiles!

Are you, or any of your family members, afraid to smile because of uneven or "crooked" teeth? Well, there's an answer! Today's dental technology offers a wide variety of simple, yet effective, methods that can provide you and your family with the many benefits of straighter teeth:

- a beautiful, winning smile.
- a handsome profile.
- healthier teeth and gums.
- better food digestion.
- generally feeling better about your appearance.

Now, your family can have the smiles they've always wanted!

For children, we can help solve many of the challenges that come with growing up through:

Space Maintenance

Insuring no valuable space will be lost for adult teeth when baby teeth are lost early.

Minor Tooth Guidance

Correcting a simple irregularity of one or more teeth.

Interceptive Orthodontics

Helping the growing child develop properly with enough space for permanent teeth. Treatment here can often prevent the need for future orthodontic procedures.

Orthopedics

The newest concepts in helping dental bones develop into the proper relationship. This too can help prevent more serious treatment at a later time.

Mouthguards

Protecting the teeth and jaw during sporting and athletic activities. Available in a range of strengths and sizes for both adults and children.

And, it's never too late for adults to have that perfect smile!

A healthy, attractive smile is an important part of everyone's self-image. For adults, we can help through:

Cosmetic Tooth Movement

Repositioning one or more front teeth to a more pleasing position.

Bleaching Trays

Get your teeth their whitest with trays customized just for you.

Adult Orthodontics

For the complete alignment of teeth, often with "invisible" appliances, in both the upper and lower arch.

Splints

Can help relieve discomfort from problems relating to your bite, TMJ distress or grinding of the teeth at night.

Snoring Appliances

Completely reversible and non-invasive (i.e., no surgery involved) appliances that can reduce or even eliminate snoring in most people.

For more information on any of these services, please do not hesitate to ask your dentist!
