

Advanced Esthetics Professional Fee Schedule

EFFECTIVE FEBRUARY 2008

Advanced Esthetic Restorations

- Created by Aurum Ceramic/Classic AE (Advanced Esthetic) Teams™ of LVI trained cosmetic specialists.
- Unique layering techniques make restorations come alive.
- Absolutely natural incisal areas and body shading.

Call your closest Aurum Ceramic/Classic dental laboratory for pricing.

ACCES™ (Advanced Cosmetic Communication and Esthetic System)

- Exclusively from Aurum Ceramic/Classic.
- Utilizes range of two- (prescription, slides/photos and smile analyses) and three-dimensional (impressions, provisionals/temporaries, models and indices/stents) tools.
- Creates a clear blueprint for dentist-to-patient and dentist-to-technician communication.
- Serves as a valuable check on preparation requirements, shape and contour of teeth, occlusal forces, need for gingival recontouring and possible ridge recontouring.
- A template for final restorations that assures predictability in the mouth.

ACCES™ (Advanced Cosmetic Communication and Esthetic System)
(Includes: Diagnostic Wax-up, Prep Indices, Bite Stents, Temporary Stents)

COMPONENTS:

Diagnostic Wax-up

- Natural-looking, three-dimensional representation of final case.
- Shape and contour of teeth easily discussed with patient.
- Dramatically increases treatment acceptance rates.
- Pre-plan tooth reduction requirements, reducing preparation appointment time.
- Allows careful evaluation of function, anterior guidance and cuspid rise.

Custom Trays available upon request
(to capture hammular notches on the maxilla)

Fixed Orthotic Matrix

- Bonded to patient's unprepped arch while opposing arch being restored or to unprepped lower arch for diagnostic purposes.
- Maintains proper vertical and anterior/posterior position of lower arch.
- High patient compliance, not removable.

Fixed Orthotic - Call your closest Aurum Ceramic/Classic dental laboratory for pricing.

Prep Indices

- Provides four "views", created from the approved Diagnostic Wax-up, as your guideline when completing preparations:

- Incisal reduction (to ensure teeth are in proper arch form)
- Labial Prep Guide sectioned to allow portions to be "pulled away" to verify amount of labial reduction needed (3 planes) (gingival, body and incisal).

Bite Stents

- Reflects bite registration prior to preparation.
- Maintains correct vertical and anterior/posterior position of the lower arch.
- When totally relined, reflects the prep-to-prep relationship.

Temporary Stents

- Allows quick fabrication of outstanding in-office temporaries – within ten (10) minutes!
- Created from approved Diagnostic Wax-up.

Removable Anatomical Orthotic

- Clear acrylic splint with full occlusal anatomy. Ball clasps placed in posterior areas for retention.
- Opens bite in full mouth reconstruction cases, allowing patient's muscles to become accustomed to new bite position.
- Designed so patient can wear 24 hours a day, seven days a week without impeding normal functions (eat, sleep, etc.)

Note: TENS Bite or myo bite registration must accompany impressions or models with prescription to allow appliance to be constructed.

Anatomical Splint - Call your closest Aurum Ceramic/Classic dental laboratory for pricing.

Adjunctive Products

Mock-up

- Show patients a customized presentation of their new smile – without having to numb or prep teeth.
- Based on actual patient models.
- Wax added to incisal edges, occlusal table and buccal corridors to produce more cosmetic smile.
- Simple temp matrix fabricated of mock-up and returned to dental office for intra-oral placement.

Mock-up - Call your closest Aurum Ceramic/Classic dental laboratory for pricing.

NaturalTemps™

- Custom laboratory fabricated provisionals incorporating acrylic denture teeth.
- Abutments lined with cold cure acrylic at chair side, providing adjustable fit.
- Full range of denture tooth molds and shades allow exacting match with natural dentition.

NaturalTemps™ - Call your closest Aurum Ceramic/Classic dental laboratory for pricing.

Custom Advanced Esthetic Demonstration Models

Made to order - Call for pricing information.

Soft Tissue Model

- Accurate reproduction of gingival contours.
- Quickly plan for gingival situations that could otherwise dramatically influence esthetics and function of completed case.
- Height and contour of interdental papilla clearly indicated, ensuring contact points that avoid pressure on gingival.

Soft Tissue Model - Call your closest Aurum Ceramic/Classic dental laboratory for pricing.

Dentist – Laboratory Communication Checklists

Exclusively from Aurum Ceramic/Classic

Available Free of Charge from your closest Aurum Ceramic/Classic laboratory.

"Advanced Cosmetic Smile Design" Checklist.

"Managing The Bite" Checklist.

The best in dental restorations . . . Guaranteed FIVE YEAR PORCELAIN AND METAL RESTORATION GUARANTEE*

FIVE YEAR PORCELAIN AND METAL RESTORATION WARRANTY

All Ceramics, Porcelain Fused to Metal, Veneer Facings, Maryland Bridges or Crown and Bridge work will be warranted for FIVE (5) YEARS against defects in material or craftsmanship.

TWO YEARS COMPOSITES AND HYBRID COMPOSITES WARRANTY

All single composite and hybrid composite restorations will be warranted for TWO (2) YEARS against defects in material or craftsmanship. Composite Bridges are covered to a maximum of THREE (3) UNITS.

Warranty Terms & Conditions

- Cost incurred for removal or reinsertion, and incidental or consequential damages (including inconvenience, lost wages or pain and suffering) are not covered by these warranties. We do not give cash refunds.
- These warranties do not apply to bonding failures. Cases where failure occurs due to debonding and poor occlusion are not considered to be the result of our inferior materials or craftsmanship.
- These warranties do not cover cases where a reduction coping is requested by the dentist.
- These warranties are not transferable. All claims must be processed through the dentist who places the order for the original restoration. The original restoration must be returned to us within the relevant warranty period for the warranty to be honoured. No work can commence on any claim until the original restoration is returned. No alterations or changes to the original prescription are allowed. Only one repair or remake per restoration is covered by these warranties.
- We reserve the right to disallow a claim under these warranties if payment for the restoration has not been made.

Certain other terms and conditions apply to these warranties. Please contact us for additional information.
