

The Leaders in Full and Partial Denture Design

Aurum Ceramic/Classic, Your Denture & Cast Partial Professionals

For the latest in denture technology, look to Aurum Ceramic/Classic Dental Laboratories. Our outstanding Denture and Cast Partial Department is staffed with well trained, experienced and creative technical specialists well versed in the complete range of today's prosthetic techniques. At Aurum Ceramic/Classic, we blend this expertise with the finest materials available to provide the best in denture and cast partial appliances.

SR-Ivocap® For Perfectly Fitting Dentures

Combining heat and pressure polymerization with continuous injection, the SR-Ivocap Denture Polymerization System provides fit and function far superior to anything available before. In combination with SR-IVOCAP "PLUS" High Impact material, the system ensures dentures that are more fracture-resistant, tissue-compatible (no skin contact with monomer) and restore proper function. Whether used for full or partial dentures or bases/relines, SR-Ivocap means no pressure points, no increase in vertical dimension (i.e., no raised bites) and no micro-porosities (i.e., total homogeneity of material eliminates growth of bacterial flora and odour).

Vitallium® 2000 For Precise Cast Partials

We're a licensed Vitallium Laboratory as well. No matter what your cast partial needs, from traditional to state-of-the-art, Aurum Ceramic/Classic can meet them. And, quickly too! We offer 72 hour turnaround time on request.

Aurum Ceramic/Classic - Your Total Source

Our specialists are always ready to take on your special or custom requirements with new and innovative solutions. For dentures and cast partials that fit and function exactly as you prescribed, talk to the professionals at Aurum Ceramic/Classic. They're the specialists!

The Leaders in Full and

FULL DENTURES

NaturalLook™ Denture

Aurum Ceramic/Classic's exclusive NaturalLook full and partial dentures blend the best in materials (SR-Ivocap and your choice of Ivoclar or Dentsply teeth) and technique to accurately capture the patient's personality (age, gender, skin tone, facial features), smile lines, buccal corridors and embrasures. Takes into account the subtle variations of natural dentition and contours of natural tissue that makes each patient unique.

Massad Denture Technique

A simple, easy-to-use method of producing consistent dentures built on accurately reproducing the position and function of the patient's original dentition. Accomplished through internal impressions, external impressions and lingualized occlusion in the neutral zone. Results in a denture that provides superior function, will not impinge on patient's tongue or cheeks, eliminates excess oral space and facilitates retention. Patients tend to trap less food and their "external" muscles help to seat and retain the denture. Complete step-by-step instructional flipchart available.

Eclipse™ Denture

A revolutionary new concept in monomer-free dentures. No flasking, investing or boiling out means no changes in vertical dimension. Baseplate used for occlusal records and try-in formed directly on Master Model and becomes part of final denture. Dentist and patient can evaluate function and aesthetics at occlusal and try-in appointments. Final light-cure processing accomplished by technician. Superior fit and comfort. Clinically proven.

PARTIAL DENTURES

The Virginia Partial™

Perfect tissue-borne solution for preserving isolated, mobile or periodontally involved teeth. Soft silicone band retains partial by employing natural undercuts in teeth or vestibule. Flexes providing torque during mastication and cushioning remaining dentition from solid impact. Restores natural appearance to gums and smile. Postpones unnecessary tooth loss. Cast clasps and rests can also be incorporated.

Partial Denture Design

AE (ADVANCED ESTHETIC) DENTURE™

Aurum Ceramic/Classic's AE Denture Teams™ of Las Vegas Institute trained neuromuscular specialists have perfected unique techniques that create picture-perfect smiles. Every AE denture is fabricated with SR-Ivocap or Eclipse and your choice of top quality artificial teeth. And, our attention to detail and personalized communication systems ensure even the most challenging case proceeds accurately and smoothly.

Close-up of patient's initial situation.

Smile restored with "Neuromuscular" dentures.

OVERDENTURES

Aurum Ceramic/Classic technicians have been fully trained in all aspects of implant-based treatment. Each overdenture is designed to provide exacting control over tooth position and base contour. The acrylic base is carefully shaped for enhanced lip and cheek support. The exacting functional design ensures adequate retention for occlusal displacement and provides the necessary stability to prevent lateral displacement.

CAST PARTIALS

Saddle-Lock®

Uses natural mesial and distal undercut planes in proximal walls of abutment teeth for retention, eliminating buccal clasps. Oral stresses are managed naturally by transmitting them in an anterior-posterior direction utilizing the adjoining, rather than just the abutment, teeth. Can be used with completely tooth-borne removable partial dentures and with both unilateral and bilateral distal extension prostheses.

NaturalFlex™ II

Super strong partials, removable dentures and long-term temporaries based on acetyl resin technology proven in European dentistry over a decade. Lightweight, yet among the most resistant and stiffest non-reinforced materials, NaturalFlex II tooth- or tissue-coloured clasps are every bit as thin as those made from metal – without sacrificing function or longevity. Available in twenty colour-stable shades and three pink hues to ensure a perfect customized esthetic match for every patient. Biocompatible, non-allergenic and monomer free.

Aurum Ceramic/Classic . . . Check Us Out, We Have A Lot To Offer!

You can rely on Aurum Ceramic/Classic for outstanding personal service - every day, on every case. Consider all we have to offer!

On-Target Technical Support

New techniques. Individual case requirements. Our highly trained, experienced managers have the answers you need. Call toll-free.

Unparalleled Service

Fast turnaround time. Special rush service. Courteous staff. It all adds up to the superb level of service you can expect from Aurum Ceramic/Classic.

Consistent Quality

Every case is constructed using only the finest quality materials, carefully adjusted and exhaustively checked before shipment to you.

Canada's Most Extensive Free Pick up and Delivery

Serving over 10,000 centres across Canada. Reliable door-to-door service that gets your case to us and back to you in record time.

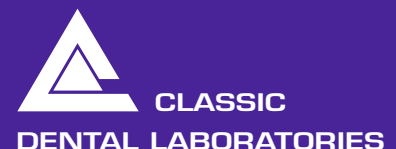

100% Guaranteed

All work is covered by Canada's most extensive guarantee program against defective materials and craftsmanship as outlined on the back of this brochure. No fine print. No arguments. Just repaired or replaced free of charge.

Whether you need full dentures, partial dentures or cast partials, Aurum Ceramic/Classic is your Denture Specialist. Call us for all the details on how Aurum Ceramic/Classic can deliver the best in Denture service to you.

See the back page of this brochure for the Toll-Free number of the laboratory location closest to you.

Computerized Prosthesis Design

Clear, Graphic Communication ... Great Practice-Builder

Clear communication between dentist and laboratory technician has always been a critical part of any successful restoration. Now, through Aurum Ceramic/Classic's computerized design system, vastly improved communication can be easily accomplished.

COMPLETELY CUSTOMIZED DESIGNS - FAST AND ACCURATE

Unlike catalogue systems that merely list completed designs, the Aurum Ceramic/Classic System maintains a library of all the various components (i.e., teeth, clasps, rests, connectors and crowns) needed to create a custom prosthesis. The system also allows the operator to specify tooth condition, crown and clasp type as well as various courses of action (tooth extraction; placement of crowns and bridges; insertion of clasps, rests and connectors) and materials. In fact, up to 15,000 partial designs per arch are possible. Crown and Bridge, Gold Crown, PFM, Post and Core, Implant and Veneer cases can be designed just as easily.

AUTOMATICALLY APPLIES PROPER DESIGN CONCEPTS

The system applies one of the three common clinical methodologies (Stress Broken, Semi-Rigid or Mixed Technique) in automatically designing each case. The patient's current situation (i.e., missing teeth) is displayed on the computer screen. Accessory items, such as crowns or bridges are inserted as necessary. The computer then creates a recommended design taking every possible configuration of the missing teeth into account. This design can be further customized by modifying the clasps, crowns, etc.

DETAILED, FULL-COLOUR PLOT PROVIDED

Plots clearly outlining several different treatment possibilities are sent to the practitioner for consideration and approval before the final impression is taken. As the system stores all designs, re-access and modification is easy. The same plots can be used to explain proposed treatment plans to the patient, making them an excellent patient education tool.

Denture and Cast Partial Guarantees

Aurum Ceramic/Classic Dental Laboratories offers one of Canada's most comprehensive warranties on all new dentures and cast partials. Warranties and guarantees do not apply to denture/cast partial repairs or relines.

TWO YEARS COVERAGE!

Every new full or partial denture we produce for you carries a TWO (2) YEAR GUARANTEE against defects in material or craftsmanship* - Free of Charge.

CAST PARTIALS COVERED TOO!

The same two year denture coverage also applies to the acrylic portion of each cast partial case. Even more important, Aurum Ceramic/Classic guarantees the metal framework for FIVE (5) FULL YEARS against defects in material or craftsmanship.*

EXTENDED WARRANTY AVAILABLE!

Now, you can insure any full denture for an additional three years (total of FIVE (5) FULL YEARS) at a minimal cost!

Sign up today! Coverage on each applicable denture begins automatically when you register your office under Aurum Ceramic/Classic's Denture Insurance Program.

** Certain terms and conditions apply. Guarantee covers repair or replacement of prostheses only. Costs incurred for removal or reinsertion; incidental or consequential damages (including inconvenience, lost wages or pain and suffering) and cash refunds for completed work are not covered.*
