

Make Your Case Presentations Come Alive with

Study Models from Space Maintainers

Give your patients a clear perspective on what your prescribed treatment will accomplish with beautifully finished Study Models from Space Maintainers. And, as treatment proceeds, these models serve as a permanent record of each patient's progress.

Space Maintainers' attention to detail and care in providing a high quality finish ensures professionally sculpted Study Models that become an invaluable part of your case presentation. And, they're equally valuable in either Orthodontic or Crown and Bridge situations.

Each set of Space Maintainers Study Models is:

- trimmed to the most exacting specifications
- sanded, soaped and polished to a high gloss finish
- clearly inscribed with the patient's particulars on the back

All we require to fabricate a perfect set of Study Models are upper and lower casts (or alginates) and a centric bite registration to aid in trimming.

Let Space Maintainers make your case presentation come alive!
