

NaturalTemps™ and Super NaturalTemps™

Provisional crowns and bridges that rival natural dentition!

Today's treatment plans are more comprehensive than ever before. And, to accomplish them, you need provisional restorations that will last months! Now, with Aurum Ceramic/Classic's exclusive custom laboratory-crafted Natural Temps™ and Super NaturalTemps™, you can supply long-term temporaries that stand the test of time.

Most Esthetic Provisionals Available Today.

Natural line angles, embrasures, surface texture and occlusion. Emergence profiles carefully developed, aiding in tissue healing and improved oral health.

Wide Range of Indications. Long-term treatment plans. Full-mouth reconstruction. Transitional loading for implants. Stability for periodontal treatment.

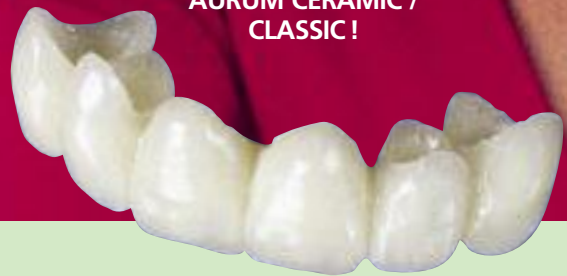

Outstanding Function and Longevity. Relined with cold cure acrylic at chairside for long-term adjustable fit. Prepared teeth kept in stable position, preserving occlusion and contact with adjacent dentition. Allows patient to perform daily functions without interruption, even over extended periods. Kind to soft tissues, prosthesis can be adapted over time to new contours as gingival tissue heals and changes.

Perfect Diagnostic Tool. Evaluate esthetic options, pulp vitality, soft tissue interaction, occlusion and phonetics. Improves case acceptance. Allows patient preview and acceptance of restoration shape, contour, colour, width and lip length.

Build Your Practice With Aurum Ceramic/Classic

NaturalTemps™

- Utilizes acrylic denture teeth with abutments hollowed out to fit over your preparations.
- Ensures a full range of shade, mould and size options, allowing an exacting match with remaining dentition.
- Ribbond is used in all bridges to add strength to the restorations.

Super NaturalTemps™

- Created from acetyl resin technology proven in European dentistry for more than a decade.
- Up to 20 times harder than restorations fabricated from standard acrylic materials. Excellent tensile and shock strength.
- Twenty colour-stable shades and characterization ensure perfect customized esthetic match.
- Advanced Cosmetic techniques provide life-like incisal areas.
