

AE (Advanced Esthetic) TEMPS™

Aurum Ceramic's exclusive new AE (Advanced Esthetic) Temps offer a revolutionary combination in a premium temporary: exceptionally high flexural strength and unsurpassed world-class esthetics. Perfect for a wide range of cosmetic and restorative options: Long-term treatment plans, full-mouth reconstruction, vital support and transitional loading for implants and stability for periodontal treatment.

Dazzling Esthetics

Custom-laboratory fabricated, each AE Temp is crafted exclusively for each patient. Our AE Team™ of cosmetic provisional specialists have perfected unique techniques that create picture perfect smiles. Imagine: Natural characterization, line angles, embrasures, surface texture and occlusion – all make AE Temps the most life-like temporary available!

Outstanding Function and Longevity

High flexural strength allows patient to continue to perform daily function without interruption, even over extended periods of time. Superior physical properties, durability and wear resistance allows clinicians to temporize even full mouth reconstruction and implant cases with perfect confidence. Easy to repair, reline and place conventionally. Prosthesis can be adapted over time to new contours as gingival tissue heals and changes.

Perfect Diagnostic Try-in Tool

Evaluate esthetic options, pulp vitality, soft tissue interaction, occlusion and phonetics. Improves case acceptance. Allows patient preview and acceptance of restoration shape, contour, color, width and lip length. Seat immediately if patient satisfied. Unlike other try-in alternatives, can also serve as a high-quality treatment guide.

Tissue-Friendly, Biocompatible Option

Monomer-free formulation and extraoral laboratory cure promote lower levels of patient sensitivity. Emergence profiles carefully developed, aiding in tissue healing and improved oral health.

Expertise You Can Rely On

Aurum Ceramic has the knowledge, proven technical abilities and creativity to deliver unsurpassed Advanced Esthetic Results on every AE Temp — every time. Call your closest Aurum Ceramic laboratory TOLL FREE (please see reverse for locations and contact information).
