Experience the Magic of Digital Dentistry...

At Space Maintainers, we utilize the latest digital technologies to deliver superior accuracy, communication and convenience for removable orthodontics — from scan, design and model production to fabrication of final prosthesis.

Convenient Digital Models
• From your chairside intraoral scans (STL files) - or from your supplied physical orthodontic models, impressions, and bites!
• All records stored on our secure server.

High Precision Printed Models
• Printed from your digital 3D scan files.
• Totally flexible fabrication options.
• Have a select model segment printed — or a full set of work or study models, with or without a base.
• Physical models can be milled as needed.

View your digital records on-screen with Brightsquid Dental Link
• Highly intuitive software
• Specific data about the model, patient, etc. displayed.
• Zooming and panning with full 3D rotation
• Includes tooth, arch, and various diagnostic measurements.
• Capture and print any view using the convenient Snapshot Printing function.
• Integrates seamlessly with most leading dental practice management software systems
