Precision through Digital Dentistry...
From Space Maintainers
Accurate – Fast – Innovative – Cost-Effective
Experience the Magic of Digital Dentistry...

At Space Maintainers, we utilize the latest digital technologies to deliver superior accuracy, communication and convenience for removable orthodontics — from scan, design and model production to fabrication of final appliance.

Take advantage of our extensive Scanning Systems experience
- Apply proven digital impression systems (e.g., Cadent iTero™; 3Shape TRIOS and Lava™ C.O.S.) in your practice – cutting chair time, speeding up turnaround times and dramatically reducing the space requirements for records storage.
- Superior accuracy without distortion, on-screen 3-D visualization and immediate adjustment in real time.

Convenient Digital Models
- From your chairside intraoral scans (STL files) - or from your supplied physical orthodontic models, impressions, and bites!
- All records stored on secure servers.

High Precision Printed Models
- Printed from your digital 3D scan files.
- Totally flexible fabrication options.
- Have a select model segment printed — or a full set of work or study models, with or without a base.
- Physical models can be milled as needed.
View your digital records on-screen with Brightsquid Dental Link

- Highly intuitive software
- Specific data about the model, patient, etc. displayed.
- Zooming and panning with full 3D rotation
- Includes tooth, arch, and various diagnostic measurements.
- Capture and print any view using the convenient Snapshot Printing function.
- Integrates seamlessly with most leading dental practice management software systems

Ask us for details on getting Brightsquid installed at no charge today!

Communicate Securely with Secure-Mail

- Brightsquid’s compliant messaging system.
- Protect confidentiality of patient information.
- Works just like e-mail tools you are used to (and with your existing email address)
- Exchange prescriptions, photos and information securely with specialists, labs and peers.
- Meets compliance standards in terms of secure connections, encryption of data, back-ups, access logging and auditability.
- Attach files up to 500 MB per message.
- View, annotate and manipulate files.
- Unlimited Storage.

Tired of Storing Orthodontic Models and Records? Our exclusive Digital Orthodontics Records Package is the Perfect Answer!

- Accurate, organized and easy-to-understand.
- Provides for essential dental/legal requirements.
- Utilize your preferred type of analysis and even include a Schwartz or Mixed Dentition Model Analysis if desired (nominal additional fee applies).
- Includes all the documentation you need for each case:
  - Digital full-colour Cephalometric Tracing.
  - Comprehensive Cephalometric Analysis Sheet.
  - Scans of your Orthodontic Study Models.
